INFORMATION DISCLOSURE STATEMENT

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 C.F.R. §1.98, the art identified in the appended documents and other information and matters discussed below may be helpful to the U.S. Patent and Trademark Office in its consideration of the above-identified application.

Enclosed is a check in the amount of \$180.00. If any additional fees are required in connection with this Information Disclosure Statement, the Commissioner is authorized to charge Deposit Account No. 23-0785.

U.S. Patent No. 5,195,984 discloses and claims inventions that in certain respects are similar to the inventions disclosed and claimed in this reissue application. This patent has the same inventive entity and the same assignee as this reissue application.

U.S. Patent No. 5,195,984 is the subject of Reexamination Control No. 90/007,628. In this reexamination, the Requester asserts that at least claim 1 is unpatentable over U.S. Patent No. 4,739,762 ("Palmaz") in view of the Wallace or

Charnsongovej articles ("the connected z-stent art") and claim 3 is unpatentable over Palmaz in view of the connected z-stent art and further in view of U.S. Patent No. 4,969,458 ("Wiktor"). In the Order granting the request, the Examiner indicated that the connected z-stent art raises a new question of patentability as to claim 1 and Wiktor in combination with other prior art raises a new question of patentability as to claim 3. The Examiner is requested to consider the Request for Ex-Parte Reexamination document and the Order Granting/Denying Request for Ex-Parte Reexamination document.

There has not been a substantive Office Action in that reexamination proceeding. However, Patent Owner has recently filed a Submission Pursuant to 37 C.F.R. 1.565(a) document and an Information Disclosure Statement document, copies of which are respectively appended hereto in Exhibits A and B hereto. Appended hereto in Exhibit C is a Form PTO-1449 which incorporates the relevant references set forth in the PTO-1449s from the previously filed Information Disclosure Statements referred to in Exhibit B hereto. Also appended hereto for the Examiner's convenience is a copy of all the materials identified on the Form PTO-1449 that have not already been indicated as having been considered. The Examiner is requested to indicate that the information contained herein has been considered during the prosecution of this application by providing an initial in the left hand column next to each reference or document.

As indicated in the paragraph that spans pages 5 and 6 of Exhibit B hereto, there have been assertions made as to the unenforceability of the '417 patent. These assertions have been based on the alleged withholding of certain connected z-stent art and the Wiktor patent, and certain alleged misrepresentations of the prior art during the original

prosecution of the '417 patent. The Examiner's attention is invited to the various materials identified in the above-identified paragraph in Exhibit B hereto.

The Examiner's particular attention is invited to the alleged withheld prior art as follows:

1. U.S. Patent No. 4,969,458 to Wiktor (Wiktor Patent)
2. U.S. Patent No. 4,580,468 to Cesare Gianturco (Gianturco Patent)
3. Wright et al., Article: "Percutaneous Endovascular Stents: An Experimental Evaluation" Radiology, Vol. 156, pgs. 69-72, 1985. (FR)
4. Duprat, et al., Article: "Flexible Balloon- Expanded Stent for Small Vessels Work in Progress1 ", Radiology, Vol.162, pgs. 276-278, 1987. (FL)
5. J. Rösch et al., Experimental Intrahepatic Portacaval Anastomosis: Use of Expandable Gianturco Stents, Radiology, Vol. 162, pgs. 481-485, 1987. (GI)
6. Lawrence et al., Percutaneous Endovascular Graft: Experimental Evaluation, Radiology, Vol. 163, pgs. 357-360, 1987. (DN)
7. J. Rösch et al., Modified Gianturco Expandable Wire Stents In Experimental and Clinical Use, Ann Radiol, Vol. 31, No. 2, pgs. 100-103, 1987. (GJ)
8. J. Rösch et al., Gianturco Expandable Stents In the Treatment of Superior Vena Cava Syndrome Recurring After Maximum Tolerance Radiation, Cancer, Vol. 60, pgs. 1243-1246, 1987. (GK)
9. J. Rösch et al., Gianturco Expandable Stents in Experimental and Clinical Use, Program: "Twelfth Annual Course on Diagnostic Angiography and Interventional Radiology" (Society of Cardiovascular and Interventional Radiology, Pittsburgh, PA) March 23-26, 1987. (GZ)
10. J. Rösch et al., Abstract, Expandable Gianturco-Type Wire Stents in Experimental Intrahepatic Portacaval Shunts, Program: "72nd Scientific Assembly and Annual Meeting of the Radiological Society of North America", November 30 – December 5, 1986, Radiology, Vol. 161, pgs. 40-41, 1986. (JF)

11. Yoshioka et al., Article: "Self-Expanding Endovascular Graft: An Experimental Study in Dogs" AJR, Vol. 151, pgs. 673-676, 1988. (FF)

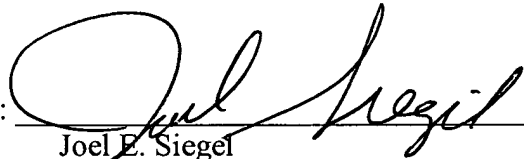

The Examiner's attention is further invited to page 76 of the Palmaz et al. article entitled "Expandable Intraluminal Graft: A Preliminary Study", Radiology 1985, wherein it is indicated that the Palmaz grafts could be used "in tandem".

Identified as items JG to JM on the Form PTO-1449 are recent Court Orders and Opinions concerning U.S. Patent Nos. 5,102,417, 5,195,984, 5,902,332 and 4,739,762, copies of which are appended hereto.

If the Examiner is unable to locate any of the documents identified on the Form PTO-1449, Applicants' attorney requests that the Examiner call him to provide a copy of any such document before issuing the next Office Action.

Respectfully submitted,

Date: 4/6/2006
